Self-similarity is a profound concept that shapes many of the laws governing nature and underlying human thought. It is a property of widespread scientific importance and is at the centre of much of the recent work in chaos, fractals, and other areas of current research and popular interest. Fractals, Chaos, Power Laws (Manfred Schroeder) - review Fractals, Chaos, Power Laws is more accessible than this would suggest, however, because it doesn't systematically develop any body of theory and consists of short sections that are largely independent. The more involved material can easily be skipped over and there's a wealth of examples and applications as motivation.
